

Create a free website in four steps

Step #1: Create an account

Sign in to Google and Homestead to create your website.

1. Visit www.GYBO.com/getonline.
2. Click the button labeled "Create your website."
3. Follow the prompts to sign in with your Gmail account or create one.
4. Create a user ID and password for your Homestead website.

Well done! You've set up your account, and you should now be logged in to Homestead websites.

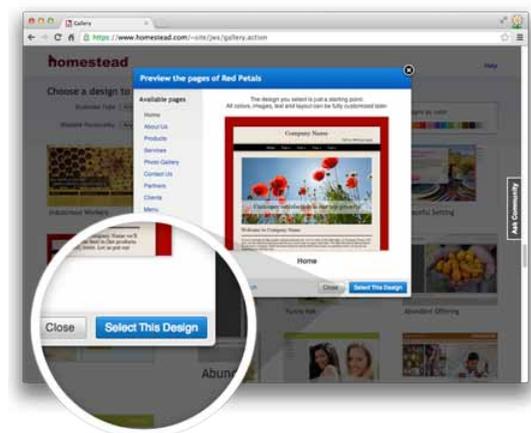

Step #2: Choose a website design

There are hundreds of customizable website templates to choose from.

1. Click on "1: Pick the design you want for your website."
2. Choose a template that you like (you might choose one based on color or design) and click "Select This Design."
3. Enter your business contact information. Click "Use This Info."
4. Click on "Continue to Website Editor."

You're moving right along. Once you've chosen your template, it's time to make the site your own.

Step #3: Customize, save and publish

Using your web editor, personalize this template to fit your business needs. Here are some options for customizing your site:

1. Edit your website with the tools on the top navigation.
2. Select a page to edit, or add a page from the "View Page" menu.
3. The yellow page icon displays the master page template where you can make changes that appear on every page of your site (like your header and footer).
4. Give each page a unique, specific name and description by clicking on "Page Settings."
5. Double-click text to make edits directly to the text boxes on your web pages. You can change font, color, or add links using the pop-out box on the left hand-side.
6. Click images to edit or replace them directly on your web pages. Use your own images, or choose from thousands of free images in the Image Library.
7. Ready to go live? Click the "Publish" button.

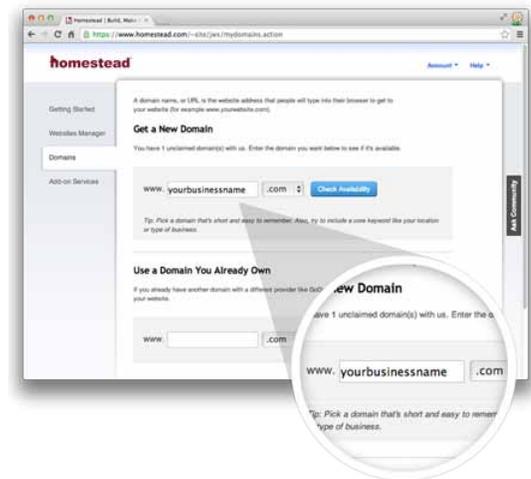

Great job on publishing your site, but you aren't done quite yet. Now it's time to register a domain name.

Step #4: Choose a domain name (www.yourname.com)

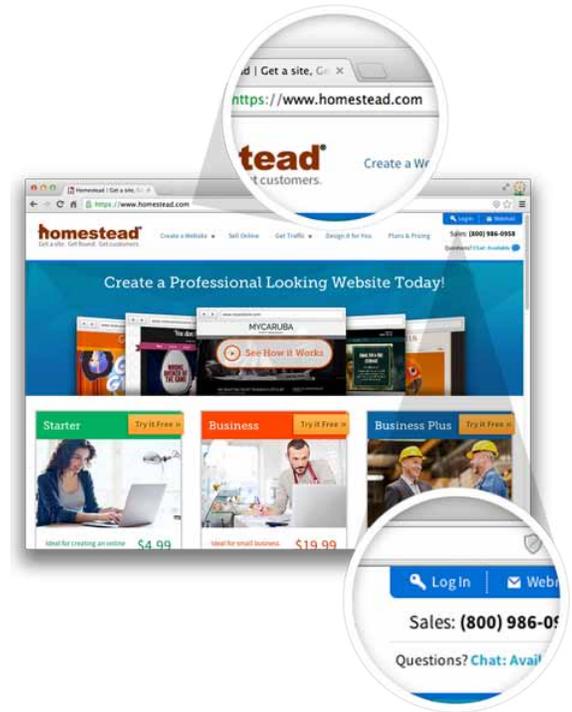

1. Click "Website Manager" to return to the welcome page.
2. Click on "3: Choose a domain (www.yourname.com) for your website." If you don't see this, click "Domains" on the far left navigation.
3. Enter the domain name you'd like, then click "Check Availability."
4. Once you've selected a domain name, enter your contact information.
5. You'll be asked to provide a credit card for verification. It will not be charged.*
6. You have the option to keep your contact information private for \$1/month, or you can opt out by unchecking the Domain privacy checkbox.

Go ahead and pat yourself on the back. You've just created a website and chosen a domain name for your business. Congratulations!

Returning to your website editor

1. On your computer, search for Homestead.com.
2. Click on "Log In" in the top right, and sign in. (Your User ID is the email address you used when you first created your account.)
3. Once logged in, click on "Website Manager" then "Edit Site" to return to your Sitebuilder Plus website creator.
