Webster Avenue Opens with Ribbon Cutting

(Green Bay, WI)– The Department of Public Works is pleased to announce the completion of South Webster Avenue’s reconstruction. To commemorate these improvements, DPW will host a ribbon cutting on December 6, 2017 at 1:00 pm. Attendees may gather at Baird Place, at the southeast corner of East Mason and South Webster.

This reconstruction project included upsizing the storm sewer, replacing water main and sanitary sewer, upgrading traffic signals, and improving concrete pavements and pedestrian crossings. Construction planning required significant traffic pattern modifications, and coordination to maintain business and emergency access, which is unique to this corridor. The success of the project is due to extensive cooperation with adjacent property owners and the contractors. The reconstruction started in May, and cost approximately \$3 million. Advance Construction, Inc. was the prime contractor.
