expansions to Recycling Program

Recyclables in Brown, Outagamie and Winnebago counties are collected curbside and from drop off centers, and are then brought to the publically-owned and operated Tri-County Recycling Facility located in Appleton, WI.

The Tri-County Recycling Facility is where the recyclables are:

- **Separated** from one another by hand and by high tech sorting equipment
- **Compressed** into storage bales for easy shipping
- **Marketed** and sold to companies to be re-manufactured into a wide array of new products

The facility has grown to accept material from most northeast Wisconsin and Upper Michigan communities. Nearly 100,000 tons of recyclables are processed each year utilizing staff from a two-shift operation.

After careful consideration of the reliable and growing markets for cartons and other plastic types, the Tri-County Facility invested in an expansion to allow for the recovery of other materials.

In December 2014, the recycling program announced its “newly” accepted items:

- **Cartons** (milk, juice, soup, wine, etc.)
- **Dairy containers & lids** (yogurt, sour cream, margarine, cottage cheese, etc.)
- **Produce, bakery and deli containers** (berry, donut, potato salad, etc.)

The Tri-County Recycling Facility continues to be a centerpiece of Wisconsin’s recycling industry, creating jobs, protecting the environment, conserving resources and encouraging all to Recycle More...Landfill Less.

Group tours are available by calling 920-968-5721.

*Tours are offered M - F, 8:00 am to 3:00 pm.
2nd Shift tours are offered upon request.*

**2015
Recycling
Success!!!**

Last year **97,948 tons** of material was diverted from the landfill and recycled. this is equal to 6,530 semi truck loads!

*Recycling More...
Landfilling Less*

did you know...

...that we accept:

cartons:

milk, soy milk, juice, cream, egg substitutes, broth, soup, wine, etc.

dairy containers:

yogurt, margarine, cottage cheese, sour cream, etc.

produce, bakery & deli containers:

berry, donut, potato salad, dips, etc.

www.RecycleMoreTriCounty.org

TOP 5 recycling questions

1

What do I do with plastic bags?

Plastic bags are highly recyclable, but **NOT** through your curbside program. The Tri-County Recycling Facility is not designed to remove plastic bags, and the bags wrap around equipment causing maintenance issues. Please take your plastic bags, wraps and other film plastics to a local retail or grocery store to be recycled.

2

What plastics can I recycle?

All Plastic Bottles & Containers:

- Soda, Water & Other Drink Bottles
- Food & Household Bottles, Jars and Jugs
- Dairy Containers & Lids
- Produce, Bakery & Deli Containers

Please remember to empty and rinse all bottles and containers and to remove and discard all screw caps.

3

Should I remove my bottle caps?

Yes! Removing your bottle caps is a good recycling habit. When caps are left on, the liquids stay in the bottle which makes it difficult for the specialized machinery to properly sort the plastic. Also, due to their small size, the plastic caps end up in our glass collection system which makes our glass less valuable to a buyer.

4

What should I do with shredded paper?

We ask that you put shredded paper in a paper bag; staple it closed, label the bag and put it in your curbside container.

This method keeps the small pieces of paper from blowing around the neighborhoods while sitting at the curb, during transportation and at the recycling facility. **DO NOT use PLASTIC bags!**

5

What do I do with Styrofoam?

The Tri-County Recycling Program does **NOT** accept Styrofoam as very few markets are available.

Consider a reuse option for Styrofoam, otherwise place it in the trash.

Where do I recycle plastic bags and wraps? **Not curbside!**

Recycle **clean, dry** plastic bags and film packaging

Produce Bags

Newspaper Bags

Case Wrap
(e.g. snacks, beverage cases)

Retail Bags

Food Storage Bags

Air Pillows

how2recycle.info

- ONLY frozen food bags with the above how2recycle label
- NO prewashed salad mix bags
- NO degradable bags

Napkin, Paper Towel, Bathroom Tissue and Diaper Wrap (packaging)

Bread Bags

Dry Cleaning Bags

Recycled plastic bags and wraps can become new packaging or durable home building products.

2016 AGRICULTURE & HOUSEHOLD HAZARDOUS MATERIAL

Clean Sweep

For farmers, residents and qualified businesses of Calumet, Outagamie and Winnebago Counties.

Acceptable Materials:

Pesticides	Gasoline
Herbicides	Automotive Fluids
Poisons	Toxic Cleaners
Dioxins	Degreasers
Lead & Oil Based Paint	Waxes/Polishes
Spray Paint	Mercury
Varnish/Stain	Unknown Chemicals
Solvents	

Household Hazardous Materials

are found in sheds, garages, basements, craft rooms, workshops or under kitchen sinks in many homes. Often these products are labeled with words such as: Caution, Warning, Danger, Poison, Flammable, Combustible or Corrosive.

Agricultural Hazardous Materials

such as pesticides, herbicides and chemicals are found on both active and abandoned farms. Banned substances such as DDT, Chlordane, and Silvex, 2, 4-D will be accepted.

Business Hazardous Materials

will be accepted from businesses identified as Very Small Quantity Generators (VSQG) and located within the participating Counties. Businesses must pay for their disposal costs, but may avoid on-site pick up fees. Eligible businesses may receive a 50 percent subsidy for disposal of pesticide wastes.

Why Participate in this Event?

When disposed of improperly, household and agricultural hazardous materials can threaten the quality of our drinking water, increase the threat of algae bloom and threaten the safety of sanitation workers.

In addition, hazardous materials left around the house and garage pose an accidental poison risk to children and pets.

Important Information for Clean Sweep Participants

- **DO NOT MIX** materials together.
- Tighten caps/lids and transport materials upright in a cardboard box. Your containers must be left at the collection site.
- **Appointments are required.**
- Household containers are typically 5 gallons or less in size. Household or agricultural **containers larger than 5 gallons** should be identified when scheduling your appointment.
- Please identify the material source (i.e. your home, an active or abandoned farm).
- This service is free of charge for household and agricultural material. **Donations will be accepted** to help offset program costs.

The following materials **WILL NOT** be accepted at the Clean Sweep Events:

For proper disposal, please contact your county.

- Latex paint
- CFL and fluorescent light bulbs
- Electronic devices (TVs, computers, printers, etc.)
- Propane cylinders and gas tanks
- Vehicle and household batteries
- Explosives and ammunition
- Radioactive material (smoke detectors)
- Appliances (Microwaves, stoves, dehumidifiers, etc.)

Book your appointment today!

www.tricountycleansweep.com

All appointments must be made by 3 p.m. on the day prior to the event.

No internet access? Call your county office listed below. Hours will vary.

electronics Recycling

Computers, computer accessories, TVs, cell phones and other electronics contain harmful materials including lead, mercury, cadmium, chromium, other heavy metals and chemical flame retardants. When thrown in the landfill, incinerated or illegally dumped, these chemicals can leach into the environment, where they may affect human and environmental health.

It is also important to recycle electronics because of the valuable reusable materials they contain, including plastics, metals, circuit boards and others. Recycling or reusing these materials reduces environmental impacts and economic costs by reducing the need for virgin materials in producing new electronics.

According to the DNR, electronics are one of the fastest growing parts of the waste stream in the United States. Each year there are millions of pounds of electronic waste in Wisconsin alone.

Many electronic devices have been banned from landfill disposal in Wisconsin. Although collection fees may still be imposed by local collectors for the recycling of the electronic device, this law was designed to make recycling more convenient, especially in rural areas.

State Law requires the following items to be recycled:

- **Televisions**
- **Computers** (desktop, laptop, notebook and tablet computers)
- **Printers/scanners/copiers**
- **Computer monitors**
- **Computer accessories** (keyboards, mice, speakers, hard drives and flash drives)
- **E-readers**
- **DVD, VCR and DVR players**
- **Fax machines**
- **Cell phones**

Recycling

DOs & DON'Ts

Glass

ACCEPT:

- Food and Beverage Bottles and Jars

DO NOT ACCEPT:

- No Windows, Ceramics or China

GUIDELINES:

- *Rinse bottles and jars*
- *Metal caps and lids should be recycled, discard plastic caps and lids*

Aluminum & Steel

ACCEPT:

- Aluminum Cans and Bottles
- Steel, Tin and Bi-Metal Cans
- Empty Aerosol Cans
- Metal Lids

DO NOT ACCEPT:

- No Aluminum Pans or Foil
- No Empty Paint Cans

GUIDELINES:

- *Rinse cans and bottles*
- *No need to remove labels*

Paper

ACCEPT:

- Milk, Juice & Soup Cartons
- Cardboard & Paperboard (cereal box)
- Newspaper & Inserts
- Junk Mail & Office Paper
- Phone Books, Books, Magazines & Catalogs
- Shredded Paper (put in brown paper bag & staple shut)

DO NOT ACCEPT:

- No Tissue
- No Paper Contaminated by Food or Grease

GUIDELINES:

- *Flatten and cut cardboard to no larger than 2' X 2'*

Plastic

ACCEPT:

- All Plastic Bottles & Containers:
- Soda, Water & Other Drink Bottles
- Food & Household Bottles, Jars and Jugs
- Dairy Containers & Lids
- Produce, Bakery & Deli Containers

DO NOT ACCEPT:

- No Plastic Bags, Wrap or Film
- No Motor Oil Bottles
- No Styrofoam

GUIDELINES:

- *Remove all screw caps and discard*
- *Rinse bottles and jugs*

composting

Composting is Mother Nature's recycling method. By composting our food wastes and yard materials we can reduce the amount of trash put into landfills. In return, we create an all-natural soil amendment which eliminates the need to use harsh fertilizers on our lawns and gardens.

Both work in concert to create the right blend for maximum compost creation.

Place your compost near a water source for easy watering in case your pile needs moisture. Your compost pile should feel like a wrung-out sponge and smell earthy. If odor issues exist, you should turn the pile with a pitchfork to add oxygen and consider adding some "brown" material as well.

Depending on how carefully you manage your pile, composting can take from 1 month to 2 years. Most piles that are turned weekly and kept at the right moisture level can produce completed compost in about 6 to 8 weeks. Once your pile is a rich, dark color and you can hardly identify the materials you've added, you will have a finished product.

What You'll need:

- **Compost bin**, either manufactured or homemade (you can also leave the compost in a "heap," but this may be unsightly in urban areas)
- **Lawn and garden clippings, dry leaves**
- **Food scraps**, such as fruit rinds, coffee grounds, vegetable scraps, egg shells, etc. (No meat or oily foods)
- **Water source**
- **Pitch fork** for turning

Getting Started

Compost "recipes" vary among gardeners, but a good rule of thumb is 50 percent "green" material like grass clippings and food scraps, to 50 percent "brown" material such as dry leaves, and wood shavings. The "green" is rich in nitrogen and will keep the pile hot. The "brown" material adds carbon to the mix and will keep the pile cool.

Problem Solving for Odor or Pests:

- **Odors:** these are usually caused by too many "greens" or the "greens" were not adequately stirred into the mixture. Try mixing in more "browns."
- **Rodents or animals:** rodents are usually attracted to fatty foods or meats, which should not be added to the compost.
- **Moisture:** too much or too little can cause problems. Cover your compost during rainy weather to avoid over-wetting and rotting. Sprinkle a little water on the pile only in periods of drought. The moisture consistency should remain that of a wrung-out sponge.

Community Recycling in Calumet County

Recycling & waste disposal programs are managed by local government offices in partnership with Calumet County.

Electronics Recycling

Collection events are held annually.
State law requires most items to be recycled.

2016 Electronics and Appliance Collection Dates:

Wednesdays, 2-6 pm:

May 25: City of Chilton Public Works
June 8: Harrison Municipal Complex

Spring 2016 details & additional information:

Needles, Syringes & Lancets...Oh My!

Where you put it affects others!!

Over 8 million people in the US use sharps to treat all sorts of medical conditions in the home, and the number of conditions treated at home with injectable medicines continues to rise.

Wisconsin law prohibits all sharps including needles, syringes and lancets, from being disposed of in household trash or with curbside recyclables.

The Tri-County Recycling Facility is finding an increased number of used needles being improperly disposed of in the household recyclables. Improper sharps disposal is a serious public health risk due to the potential for accidental needle sticks during the hand sorting of recyclables. Accidental needle sticks may cause severe infection and may also spread communicable diseases such as Hepatitis B or C and HIV/AIDS.

For a complete list of collection facilities visit the DNR website at: <http://dnr.wi.gov/topic/healthwaste/householdsharps.html> or call the Department of Natural Resources at 608-266-2111.

THE FOLLOWING GUIDELINES ARE HIGHLY RECOMMENDED FOR ALL SHARPS USERS:

- **Place used or discarded sharps in an acceptable sharps container.**
- **Take used sharps to a designated collection facility for proper disposal.**
- **Do not place used sharps in laundry detergent bottles, coffee cans, plastic milk jugs, plastic bags, aluminum cans or soda bottles since these containers routinely end up in recycling collection trucks and burst open in the trucks.**

New Medication Disposal Guidelines

Medication drop-off locations are found all over Northeast Wisconsin for safe and proper disposal of expired or unwanted medication. Recently, the Wisconsin Department of Justice (WDOJ), who offers disposal of the medication, advised all collection programs of the new disposal guidelines for residents to follow. These new guidelines will make the program more cost-effective and hopefully more convenient for you!

Originally, medications were sorted into two categories. Controlled substances, like oxycodone or valium, and non-controlled prescription medications and over-the-counter medications. As a result, residents were asked to leave the medications in their original containers to aid in the sorting/identification process.

That collection method has now changed. WDOJ now instructs that all pills be removed from their original bottles/boxes and be mixed together, into a sealable zip-top bag. Removing the excess packaging will streamline the collection process and reduce the cost of disposal. Residents are encouraged to recycle empty pill bottles and paper boxes and discard all plastic caps and aluminum foil packs in the garbage.

As a reminder, medication collection programs are designed to collect unwanted or expired medications whether prescription or over-the-counter, human or pet medications, including pills, liquids, powders, creams/ointments and inhalers. Please keep all medicated liquids, powders and creams in their original containers. Medication collection programs cannot take new or used needles or sharps; please consult your local hospital, pharmacy or clinic. Further, these free and anonymous drop-off collections are for residential medications only.

For Local Drop-Off Locations

Brown County

Page 22

Outagamie County

Page 27

Winnebago County

Page 30

Lastly, reducing medication waste is always the best practice. Ask for samples or a low quantity of a new prescription to make sure you have no adverse side-effects to a new medication. Keep an accurate 'on-hand' list to reduce purchasing multiple bottles of ibuprofen or cold medicine when you aren't sure you have a sufficient supply at home.

10 Steps to Recovering Recycling

1 Collection: Trucks usually collect curbside recycling every other week.

2 Tip Floor: The trucks empty recyclables onto the tipping floor.

3 Metering Bin: This machine evenly meters the amount of recycling entering the facility.

6 Paper Separation: Disc Screens separate the paper from the containers. Workers look for items that don't belong in the paper. The paper is stored in hoppers until it is ready to be baled.

7 Container Separation: Metal cans are removed from the conveyor belt by a large magnet. Employees and high-tech machines are used to sort plastics and aluminum.

4 Pre-Sort Line: The sorters remove items that may harm or interfere with equipment such as plastic bags, large metal items and trash.

5 Glass Collection: Since glass is highly abrasive on conveyor belts and equipment, it is removed first and stored outside until it is shipped.

8 Baling: The materials need to be compressed into bales for easy shipping to buyers.

9 Shipping: When enough bales are created, a semi truck is loaded to deliver to buyers who remanufacture the material into new products.

10 Sales of the Material:

Paper: sold to local paper mills in Green Bay and Menasha
Plastics and Metal: sold mainly in the Midwest
Aluminum: sold to Anheuser Busch
Glass: sold to a local glass recycler in East Troy, WI

brown county

Household Hazardous Waste Facility

Household Hazardous Waste (HHW) Facility: 2561 South Broadway | Ashwaubenon

Questions: (920) 492-4950 or www.BrownCountyRecycling.org

Business and farm material by appointment **ONLY** (920) 492-4950

Residential Drop-Off Hours:

Thursdays – Noon to 6 p.m.

Saturdays – 8 a.m. to 2 p.m.

Product Exchange Room:

Thursdays – 1 p.m. to 6 p.m.

Saturdays – 8 a.m. to 2 p.m.

The Brown County Household Hazardous Waste facility accepts material from households and small businesses that pose a threat to human health and the environment. These are materials that are flammable, poisonous, corrosive or reactive. The facility is available to residents of Brown, Outagamie and Winnebago Counties. Businesses and residents of other counties will be charged a fee to drop off material at the facility.

Acceptable Materials

- Flammable - paint, gasoline, paint thinners, solvents
- Corrosive - acids, bases, cleaning products
- Reactive - pool chemicals
- Poisonous/toxic - pesticides, cleaning products
- Others - fluorescent lights, ballast, computers and electronics (for a charge), cooking oil, propane tanks, oil, antifreeze, batteries

Unacceptable Materials

- Explosives, Ammunition, Black Powder
- Flares
- Sharps
- Biological Waste
- Infectious Waste
- Radioactive Material
- Pharmaceuticals

Materials that **cannot** be brought to the Household Hazardous Waste facility are tires, infectious and biological wastes, radioactive material, explosives and ammunition. Visit our website www.BrownCountyrecycling.org for more information in regards to the disposal of these materials.

Product Exchange Room

- Much of the material brought to the facility is in good shape and doesn't need to be disposed of. Each year, 1,000s of paints, stains, thinners, pesticides, automotive products, cleaning products, etc. are placed in our Product Exchange Room for the public to take for free. This is a great place to find free material for home repairs.

What Do We Do With It?

- Most materials, like paint and solvents, are bulked into 55-gallon drums. These drums are removed by a hazardous waste contractor who further bulks the material for transportation to a company that uses it as fuel.
- Some materials, like pesticides, are packed into drums called loose packs. Loose packs are drums filled with smaller containers. These drums are sent to a disposal company for additional sorting.
- Acids and bases are sent for disposal in lab packs.
- Latex paint is sent to a company to recycle into new paint.

Household Sharps

DROP-OFF SITES

To reduce public health risks such as accidental needle sticks, Wisconsin law requires all citizens to manage sharps safely. It is illegal to put sharps in the trash or with recyclables.

Sharps users are highly encouraged to place their used or discarded sharps in an acceptable sharps container and take them to a designated sharps collection station for proper disposal.

Sharps are accepted at many pharmacies, hospitals and clinics throughout Brown County. For specific drop off locations and program guidelines go to **BrownCountyRecycling.org** and click on "sharps" on the right side of the page or call the Brown County Health Department at (920) 448-6400.

Participating business who may offer sharps collection include:

- Aurora Baycare
- Aurora Pharmacies
- Bellin Health Clinics
- Bellin Memorial Hospital
- Brown County Health Dept
- CVS Pharmacies
- Dousman Clinic
- Krider's Pharmacy
- Prevea Health East De Pere
- Shopko Pharmacies
- Shopko Express
- St. Mary's Hospital
- St. Vincent Hospital
- Walgreens Pharmacies

Did you know...

Since 1993, Wisconsin state law has banned yard waste from landfills, however, as much as **30%** of all household trash generated in Wisconsin consists of yard waste...that's **300,000 tons!**

Did you know...

if you recycle just **two gallons** of waste oil it can generate enough electricity to run the average household for almost **24 hours**?

Oil is a valuable, reusable material. It doesn't wear out – it just gets dirty. Used oil and filters brought to a collection site will be recycled and re-refined into clean motor oil or used as an alternative energy source.

Electronics RECYCLING

Residents have many opportunities to recycle electronics.

The following items are banned from landfill disposal: televisions, computers, DVD/VCR players, fax machines, keyboards, mice, speakers, flash drives, hard drives and cell phones.

Call ahead for program information

Brown County is creating both efficiency and savings from their new recyclables compactor designed by **Foth**. By fitting more material in each truck, the county can cut the number of truck trips *in half*. Long-term savings to Brown, Outagamie, and Winnebago counties are realized in reduced hauling costs *and* reduced vehicle emissions. Foth is always happy to help our clients succeed, and we are excited to implement a similar compactor installation project at the Winnebago County transfer station in 2016.

Medication DROP-OFF SITES

In order to lessen environmental and safety concerns of left-over and unwanted medications, it is important to responsibly dispose of them at a local drop box or collection event.

Brown County Sheriff's Department
2684 Development Drive - Investigative Division
Tuesdays and Thursdays, 12:30 p.m. to 2 p.m.,
except holidays.

Green Bay Police Department
307 S Adams St.; drop box in lobby,
available 7 days a week, 7 a.m. to 10 p.m.

De Pere Police Department
325 S Broadway St drop box in lobby,
available M-F 8 a.m. to 4:30 p.m.

Lawrence Town Hall
2400 Shady Ct, drop box, available M-F 8 a.m. to 4 p.m.

Oneida Police Department
2783 Freedom Rd Drop box, available 24/7

Hobart Village Hall
2990 S Pine Tree Rd., drop box in Business office lobby,
available M-F 8 a.m. to 5 p.m.

Village of Wrightstown Police Department
352 High St., Monday, Wednesday, Thursday, 8 a.m. to 4:30
p.m.; Tuesday 8 a.m. to 6 p.m.; Friday 8 a.m. to Noon

Brown County Food Waste & Organics DROP-OFF PROGRAM

The Brown County Food Waste & Organics Drop-off Program is a pilot program that began in late 2014. Residents may bring compostable organic waste like coffee grounds, fruit peels and pizza boxes to a drop-off site.

The Food Waste & Organics Drop-off Program offers anyone, including avid backyard composters, the opportunity to keep nontraditional back yard composting materials like paper towels, napkins, meat and bones, dairy products and greasy pizza boxes out of our landfill.

Why divert food waste from landfills?

Food waste makes up more than a quarter of the total waste stream. Reducing food waste has significant benefits including: reducing methane from landfills, reducing energy waste

DROP-OFF LOCATIONS:

- **Brown County Recycling Transfer Station**
2561 S Broadway,
Mon – Fri 7:30 am to 4:00 pm
& Saturday 8:00 am to 2:00 pm
- **Brown County Solid Waste Transfer Station**
3734 W Mason,
Mon – Fri 7:30 am to 4:00 pm
& Saturday 7:30 am to 2:00 pm
- **Brown County UW-Extension**
1150 Bellevue Street
Mon - Fri 8:00 am - 4:30 pm

associated with food production and creates a valuable soil amendment.

The organic material collected is taken to the University of Wisconsin-Oshkosh's bio-digester, where the materials are broken down during a digesting process. The digesting process generates methane gas used to create electricity and a high quality soil amendment that is sold. The pilot program will help us evaluate and identify composting and other food waste disposal options.

Sign up now to bring your food waste and other organic waste to a drop off location by

registering at BrownCountyRecycling.org/organics or call (920) 492-4950.

Check our website for updates www.BrownCountyRecycling.org

Hazardous Waste Collections

Outagamie County Recycling & Solid Waste

NEW French Road location,
1 block east of Hwy 441,
1/4 mile north of Hwy OO

**Appointments Only: Call 920-832-5277
or RecycleMoreOutagamie.org**

MAY-OCTOBER ONLY

Wednesdays, 8:00 am - 11:00 am

May 4 | June 1 | July 13 | Aug 10 | Sep 21 | Oct 19

Saturdays, 8:00 am - 11:00 am

May 21 | June 18 | July 16 | Aug 27 | Sep 24 | Oct 22

Acceptable Materials:

Automotive:

- Gasoline & Fuel Additives
(No on site dumping of gasoline)
- Automotive Fluids
- Lead Acid Batteries

Cleaners:

- Solvents
- Drain & Oven Cleaners
- Pool Chemicals
- Toxic Household Cleaners
- Polishes & Aerosols

Garden and Lawn Care:

- Herbicides & Insecticides
- Fungicides/Pesticides
- Weed Killer
- Poisons

Miscellaneous:

- Mercury
- Oil & Lead Paints
- Varnish/Stain/Turpentine
- Paint Thinners/Strippers
- Spray Paints/Adhesives
- Wood Preservatives
- Kerosene

Unacceptable Materials:

- Latex Paint
 - Explosives
 - Ammunition
 - Smoke Alarms
 - Medical Wastes
 - Asbestos*
 - Bulbs*
 - Propane Tanks*
- *These items may be taken to the main drop-off site for a fee.*

No containers over 5 gallons

No trailer sized loads

Latex Paint Disposal

Latex paint is made from water and is not hazardous. If the paint can says to "clean with soap and water" it is latex paint.

Disposal Directions: **for SMALL amounts:** remove the lid and let dry. Occasionally stir the paint. **For LARGE amounts:** Line a box with a plastic bag. Place an absorbent material (kitty litter, oil-dry) on the bottom, pour a layer of paint and repeat as necessary. Dispose of dried paint and dry, empty paint cans in the trash.

Household Sharps

DROP-OFF SITES

To reduce public health risks such as accidental needle sticks, Wisconsin law requires all citizens to manage sharps safely. **It is illegal to put sharps in the trash or with recyclables.**

Sharps users are highly encouraged to place their used or discarded sharps in an acceptable sharps container and take them to a designated sharps collection station for proper disposal.

NEVER PUT SHARPS IN RECYCLING OR TRASH.

Battery Recycling

LOCATIONS

Laptops, power tools, MP3 players and cell phones are just a few of the battery operated devices that have become part of our daily lives.

Rechargeable and vehicle batteries contain toxic heavy metals that may harm our environment if they are not properly disposed. Recycling opportunities exist for these battery types, lessening the environmental risks.

Typical alkaline batteries (button type, AAA, AA, C, D, 6V, 9V) are NOT considered hazardous and can go into your trash.

Did you know...

Since 1993, Wisconsin state law has banned yard waste from landfills, however, as much as **30%** of all household trash generated in Wisconsin consists of yard waste...that's **300,000 tons!**

Did you know...

if you recycle just **two gallons** of waste oil it can generate enough electricity to run the average household for almost **24 hours?**

Oil is a valuable, reusable material. It doesn't wear out – it just gets dirty. Used oil and filters brought to a collection site will be recycled and re-refined into clean motor oil or used as an alternative energy source.

Waste Oil DROP-OFF SITES

Guidelines:

- Use a dirt-free container with a leak-proof lid.
- Do Not use containers that previously held household chemicals, such as cleaners, solvents, fuel (gasoline), paint or bleach.
- Do Not mix with solvents or other material such as anti-freeze.
- Locations with a * symbol are for Outagamie County residents and family farmers only. (No factory farms or businesses).

306 N Main St, drop box in lobby, available M-F, 8 a.m. to 4 p.m.

Landfill Diversion

DROP-OFF

In an effort to reduce landfill waste, Outagamie County Recycling & Solid Waste diverts many materials out of the landfill to be recycled or repurposed.

When arriving at the Recycling & Solid Waste drop-off site, you will be asked to separate the following materials:

Clean Wood Wood pallets and lumber (no paint, stain, varnish, pressure treated) scrap

Metal Siding, lawn mowers, exercise equipment, faucets, pipes

Shingles Asphalt shingles only

Fluorescent Bulb

RECYCLING LOCATIONS

All fluorescent bulbs, including the compact fluorescents (CFLs), contain mercury. These bulbs often break when thrown into a dumpster, trash can or compactor, and end up in our landfills. By recycling CFLs and other type fluorescent bulbs we can minimize the amount of mercury being released into the environment. Recycling bulbs also allows for the reuse of glass, metals and other materials within the bulb. Virtually all components of a fluorescent bulb can be recycled.
