PERMIT APPLICATION GUIDE

***BEFORE A RAZE PERMIT WILL BE ISSUED, YOU MUST HAVE AN APPROVED
EROSION CONTROL PLAN**

1. To obtain a Raze Permit, submit an Erosion Control Plan, completed Building Permit Application, and Storm, Sanitary and Water Connection Permit Application (if applicable) to the Department of Community and Economic Development, Room 608. **Please note that ALL required information must be submitted together at one time when applying for your permit. See page 3 for methods to apply for the permit and submittal checklist.**
2. Once the Erosion Control Plan is approved by the Erosion and Sediment Control Specialist, the Raze Permit can be issued.

For submittal, fill out and follow the *Erosion Control Plan Submittal Application*, which will give you a step by step guide on what is needed for review. Also fill out the *Erosion Control Permit Application*. For any questions regarding Erosion Control, please contact:

Michael DeBauche, Erosion and Sediment Control Specialist
(920) 448-3301 or michaeldeb@greenbaywi.gov

3. If capping any plumbing lines, have a licensed plumber fill out a Storm, Sanitary and Water Connection Permit Application - External.
4. If doing any work in the street right-of-way or parking equipment on the street, you will need to secure the following permits from the Department of Public Works:
 - Street Obstruction Permit (parking equipment on street)
 - Street Excavation Permit (digging in right-of-way, i.e. apron, sidewalks, and curbs)
5. After raze is completed, follow up with all Best Management Practices relating to the approved Erosion Control Plan and site will need to be stabilized.

***Note:** There will be no need for an Erosion Control Plan for any of the following:

- Razing just a garage with no excavating
- Less than 4,000 sq. ft. of land disturbance
- Less than 100 cu. yd. of excavating

Apply for the Permit:

Please plan ahead and pick one of the following methods to apply for your permit. Make sure all of the required information listed above is included and submit it to the Department of Community and Economic Development using one of the methods listed below:

- ***In Person with an Inspector at City Hall:***
 - This is the best method to discuss the specifics of your project with an inspector. Typically if all the required information is submitted and found acceptable, the permit can be issued at that time.
 - Inspectors are typically available for consultation and permit issuance 8:00 a.m. -4:00 p.m., Monday through Friday, but it is strongly encouraged to call ahead to verify inspector availability due to schedule variations for summer hours, holidays, etc.
- ***By Email:***
 - Email all the required information (see Submittal Checklist below) to inspmail@greenbaywi.gov.
- ***By Mail:***
 - City of Green Bay
Department of Community and Economic Development
100 N. Jefferson Street, Room 608
Green Bay, WI 54301

Submittal Checklist:

- Building Permit Application Long Form
- Storm, Sanitary and Water Connection Permit Application - External
- Erosion Control Plan including Erosion Control Plan Submittal Application and Erosion Control Permit Application

Payment of Permit Fees:

- Once your permit has been reviewed and you have been notified of a Project Number, you can make payment.
- Submit the applicable permit fees.
 - Residential House Raze will require a \$175 Building Permit fee (\$50 Building Permit, \$50 Plumbing Permit, \$50 Erosion Control Permit, and \$25 Erosion Control Site Plan review).
 - Residential Garage Raze will require a \$50 Building Permit fee.
 - Commercial Raze will require a \$240 Building Permit fee (\$70 Building Permit, \$70 Plumbing Permit, \$50 Erosion Control Permit, and \$50 Erosion Control Site Plan review).
- Make checks payable to City of Green Bay, or
- Pay online through GovPayNet –
<http://www.greenbaywi.gov/DocumentCenter/View/943/Online-Payment-Instructions-PDF>
A Project Number must be assigned by Inspection office staff **before** making a payment online. A service fee will be charged for online payment.

THINGS TO CONSIDER

CITY OF GREEN BAY RAZING OF STRUCTURES

1. SCOPE OF WORK

The work under this contract shall consist of razing the residential structure(s) at the specified address, filling all basements, crawl spaces and excavated areas with approved granular material, topsoil, and seed. All work shall be done in accordance with the requirements of the "CITY OF GREEN BAY STANDARD SPECIFICATIONS AND CONSTRUCTION STANDARDS FOR PUBLIC WORKS CONSTRUCTION."

2. RAZING OF STRUCTURE

The residence to be razed under this contract has been condemned by the City's Department of Community and Economic Development - Inspection Division in accordance with Municipal Ordinance 23.14. Consequently, the Contractor should be aware that the City does not own the property or residence. The contractor shall verify with the City that the residence is vacant before proceeding with demolition.

The razing operation shall be conducted in accordance with City of Green Bay Ordinance #15.65 §201 of the City Standard Specification (unless otherwise amended herein), and all other applicable State and Federal regulations, after having taken out a razing permit from the Building Inspection Division. All concrete and bituminous drives, steps, sidewalks, and the like within the property lines of the parcel shall be broken up, removed, and disposed of. Any fences or other on-site manmade amenities shall be removed. All loose material and debris shall be removed from the basement and other excavated areas. The basement or foundation floor shall then be broken into not greater than 2' x 2' pieces to assure water drainage and prevent water build-up. All remaining exterior walls, interior bearing walls, and partitions shall be removed to a point 3' below sidewalk grade or the existing ground grade, whichever is lowest.

ORDINANCE #15.65 RAZING OF BUILDINGS.

- (1) **PERMIT REQUIRED.** No person shall hereafter raze any building in the City without first securing a permit therefor from the Division of Building Inspection and a permit for the sealing of the sewer from the Plumbing Supervisor.
- (2) **REQUIREMENTS.** The holder of a permit to raze a building shall comply with the following requirements:
 - (a) **Property to be protected.** Streets, alleys, and private property shall be properly protected by erecting proper fences and scaffolds. If scaffolds are to be built on streets or alleys, they shall be properly protected with a top cover of planks, guardrails, and toe-boards to prevent the falling of debris on sidewalks or streets. The top of the scaffold shall be at least 8' above the sidewalk or alley.
 - (b) **Walls to be supported.** No person shall remove all horizontal support from exterior walls or partitions thereby permitting them to stand unsupported.
 - (c) **Buildings to be Razed Floor-by-Floor.** In buildings of more than one story, the exterior walls, interior partitions, and other supports shall be removed floor-by-floor, using the floor below as protection from falling debris and to prevent exterior and interior walls from collapsing.

- (d) Razing to be Gradual. No walls, chimneys, or other construction shall be allowed to fall en masse on a floor; and bulky material such as beams and columns shall be lowered and not thrown.
- (e) Cranes. Cranes may be used in wrecking or demolishing buildings provided the above requirements are complied with.
- (f) Sewers. When a building is moved or demolished, its sewer shall be located at a point outside the foundation lines and sealed off. The plug or seal shall not be covered until approval has been given by the Plumbing Supervisor.
- (g) Obstruction of Streets. When razing requires the obstruction of a public street, alley, or sidewalk, a permit must be obtained from the Director of Public Works as provided in §9.27, Green Bay Municipal Code, before starting work on razing of the structure.

3. UTILITY SERVICES AND PIPING

Wisconsin State Statute 182.0175 requires that the contractor who engages in excavation or demolition must notify utility service owners at least three working days before excavation. Any electrical, gas, water and telephone/cable services to the structure shall be properly disconnected prior to razing.

All utility piping, basement drains, sewers, and the like shall be cut off at the building line and permanently bulkheaded by a method approved by the City Plumbing Inspector prior to moving or razing operations. The City Inspection Division shall be notified when bulkheads are completed and before filling operations are begun

4. HAZARDOUS WASTE

Any material encountered in the demolition process that is classified as a hazardous waste by the State of Wisconsin Department of Natural Resources must be separated, contained, and disposed of according to applicable provisions of the Wisconsin Administrative Code, including but not limited to Chapter NR 181, and applicable Federal regulations.

5. AIR QUALITY

The Contractor shall make every effort to keep construction dust to a minimum as required by the Wisconsin Administrative Code and as directed by the Building Inspector. In all phases of the demolition process, the Contractor must follow State and Local codes. The City of Green Bay will follow the asbestos regulations of Chapter NR 447, Wisconsin Administrative Code, and have the structure inspected for any asbestos containing materials (ACM) and abate any friable or potentially friable ACM prior to issuing the "written notice to proceed" from the building inspector.

6. DISPOSABLE MATERIAL

All salvageable material and all other demolition waste is the property of the contractor and must be removed from the premises. Excessive accumulation of either salvageable material or demolition waste will not be permitted. All materials shall be disposed of by the Contractor in consistency with ordinances of the City of Green Bay and Brown County, and with regulations set forth in the State of Wisconsin Administrative Code. Upon the City's request, the Contractor shall provide proof (such as scale tickets) that all demolition waste has been disposed of at an approved landfill site.

7. FILLING BASEMENTS AND EXCAVATED AREAS

All loose materials and debris shall be removed from the basements, crawl spaces and other excavated areas. Upon ascertaining that all openings, pipelines and drains, etc., have been properly

capped, all basements, crawl spaces, excavated areas, and other below grade voids resulting from the removal of pavements, slabs, foundations and the like shall be filled, to within 4" of finished grade, with granular fill material meeting the following requirements: 100% shall pass the 3 inch screen and no more than 8% by weight shall pass the No. 200 screen. The material shall be well graded, free from debris and organic material. All granular fill shall be placed in layers of 12 inches or less and shall be compacted to not less than 95% of Modified Proctor (ASTM D-1557). The remaining 4" shall be top soiled, seeded and mulched in accordance with Section 801 of the City Standard Specifications.

Any areas of open "excavation" must be immediately barricaded and fenced off with standard snow fence to prevent access by the public. Yellow flashers shall be mounted on said snow fence at 20' intervals minimum when left in place overnight. Barricading shall be done in a manner acceptable to the Building Inspector.

8. PROTECTION AND RESTORATION OF PROPERTY

The Contractor shall use every reasonable precaution to prevent the damage or destruction of all overhead structures such as wire, cables, etc., and all underground structures such as water or gas shut-off boxes, water meter, pipes, conduits, etc., within or outside of the right-of-way. The Contractor shall be responsible for any damage to such items.

The Contractor shall notify the owners of all corporate or private property, which interferes with or abuts the work, advising them of the nature of any interference, and shall arrange with them for the disposition of such property. The contractor shall furnish the Building Inspector upon request with copies of all such notifications and final agreements.

The Contractor shall use extreme caution to protect streetlights and other City property within the right-of-way limits, and will be responsible for any damage. In particular, the Contractor shall replace any damaged concrete sidewalk or surface pavement.

The Contractor shall be responsible for the damage or destruction of property resulting from neglect, misconduct, or omission in his manner or method of execution of non-execution of the work, and shall restore such property to a condition similar or equal to that existing before damage was done.

9. OBSTRUCTION OF STREETS

No streets can be closed, or traffic patterns altered, without prior approval from the Building Inspector. All work sites, streets, and sidewalks affected by this contract shall be signed and barricaded in accordance with the "MANUAL OF TRAFFIC CONTROLS FOR STREET CONSTRUCTION AND MAINTENANCE OPERATIONS FOR THE CITY OF GREEN BAY".

The Contractor shall at all times conduct the work in such a manner as to insure ingress and egress to all occupied business establishments and residences abutting the project area.

10. CONSTRUCTION SITE EROSION CONTROL

The Contractor shall comply with Section 13.60 of the City of Green Bay Municipal Code (Construction Site Erosion Control Ordinance) at all times while performing the work under this Contract. The Contractor shall prepare and submit an erosion control plan to the Building Inspector. No work shall commence until an erosion control plan has been approved by the Building Inspector.

11. (2) LITTERING AT RAZING OR REMOVAL SITE.

No person shall leave litter, building debris, excavations, or ground piles on property on which a building is being razed or from which a building has been moved. If work is not being done in a satisfactory manner or is not progressing thus causing a public safety hazard and nuisance, the Building Inspection Division shall, after a written notice specifying a definite period within which persons concerned shall clean up the property and level off the ground to the adjoining level, the City shall cause such work to be done; and the cost thereof shall be borne by the property or the property owner.

12. CURB REPLACEMENT 13-1706(H)

Driveways which have been abandoned and are not included on the approved site plan shall be removed, in their entirety, to the setback line and replaced at the property owner's expense with full height curb and sidewalk (where applicable).

13. RAT PREVENTION 8.07(n)

Prior to demolition or moving of any building, the owner shall use rat-eradication measures and take all reasonable efforts to abate the rat infestation prior to commencing demolition or moving of the structure.

Excerpt from City of Green Bay Plumbing Code:

Section 16.06 Permit must be procured before starting work: If any work regulated by the Plumbing Ordinance for which a permit is required is commenced without a permit first having been obtained thereof, double the permit fee herein prescribed shall be paid when a permit finally is obtained. Payment of any fee mentioned in this Section, however, shall in no way relieve any person of the penalties that may be imposed for violation of the Plumbing Ordinance.

Following sections to be completed by the City of Green Bay

Plan Approval: Permit is void unless signed by the Erosion Control Specialist.

Erosion Control Plan reviewed and approved by Erosion Control Specialist: _____ Date: _____

Permit Issuance:

1. **Duration** – This erosion control permit shall remain valid for a period of 180 days or for the length of the building permit, whichever is longer. The Erosion Control Specialist or designated representative may extend the period one or more times for up to an additional 180 days, and may require additional erosion control measures as a condition of the extension if necessary to meet the requirements of this ordinance.

Permit Expiration Date: _____

2. **Surety Bond** - As a condition of approval and issuance of the permit, the Public Works Director may require the applicant to deposit a surety bond or irrevocable letter of credit to guarantee a good faith execution of the erosion control plan.

Surety Bond Amount \$ _____ Date Filed: _____

3. **Conditions of Approval** - This permit approval requires the applicant to:

- a. Notify the Erosion Control Specialist / designated representative at least **48 hours before** commencing any land-disturbing construction or land-development.
- b. Notify the Erosion Control Specialist / designated representative of completion of any erosion control measures within seven days after their installation.
- c. Obtain permission in writing from the Erosion Control Specialist / designated representative prior to modifying the erosion control plan.
- d. Install all erosion control measures as identified in approved erosion control plan.
- e. Maintain all road drainage systems, storm water drainage systems, control measures, and other facilities identified in erosion control plan.
- f. Repair any siltation or erosion damage to adjoining surfaces and roadways resulting from land-developing construction or land-disturbing activities.
- g. Inspect the construction erosion control measures after each rain of 0.5" or more and at least once each week and make needed repairs.
- h. Allow the Erosion Control Specialist / designated representative to enter the site for the purpose of inspecting compliance with the erosion control plan or for performing any work necessary to bring the site into compliance with the erosion control plan.
- i. Keep a copy of the approved erosion control plan on the site.
- j. Submit weekly inspection reports to the Erosion Control Specialist via e-mail at erosioncontrol@greenbaywi.gov

Failure to comply with any of these conditions may subject the permittee to corrective action, fines, and/or revocation of the permit at permittees sole expense.
