

ONE & TWO-FAMILY BASEMENT FINISH GUIDE

The information in this packet is provided to help guide you through the permit application process for finishing off your basement. This packet will also provide you with information regarding minimum construction requirements and electrical requirements.

- Page 2-3: Permit Application Guide
- Page 5: Basement Finish Layout Sheet
- Page 7: Building Code Requirements
- Page 8: Egress Window Requirements
- Page 9: Electrical Requirements
- Page 11-24: Permit Applications

PERMIT APPLICATION GUIDE

Basement Permit Guide:

This guide was developed to help direct you through the permit application process. Following the steps below will help to expedite the issuance of your building permit.

1. Completely fill out the attached Building Permit Application:

- Provide a detailed description of all proposed work. Property owners may obtain permits for construction projects if the house is owner-occupied. All contractors shall include their Dwelling Contractor Certification and Dwelling Contractor Qualifier Certification numbers from the State of Wisconsin Safety and Buildings Division.

2. Provide Set of Building Plans and Layout of Basement:

- The Plans must be of professional quality and legible.
 - Acceptable plans can be submitted from building supply stores.
 - Fill out Basement Finish Sheet.
 - Fill out layout of basement with dimensions and room identification.
- Include the following information:
 - The height of the ceiling.
 - Door and window locations with dimensions.
 - Material and size of headers.
 - Egress window detail (size, height from floor, window well).
 - Dimensions of rooms labeled in feet/inches.
 - Label the room use (bedroom, kitchen, living room, etc.).
 - Structural features such as size, species and grade of lumber and other structural materials used for walls, beams, headers, studs and columns.
 - Include plumbing fixture locations (bathroom/kitchen/bar) if applicable.
 - Include electrical fixture locations (see Basics for Remodel Wiring Sheet).
 - Fill out **Electrical, Plumbing and HVAC Permits** if applicable and submit. There are two different types. If you, as the owner, are doing the project, then fill out the “*Homeowners*” permit. If you are hiring a contractor, have them fill out their “*Contractors*” permits and submit those for review.

3. Permit Fees:

- Submit the applicable permit fees. Basement permits are based on the square footage of the finished area (.095 per square foot) and a \$25 Building Plan fee (under 1,000 square feet) and \$50 Building Plan fee (over 1,000 square feet).
 - Make checks payable to City of Green Bay, or
 - Pay online through GovPayNet
<http://www.greenbaywi.gov/DocumentCenter/View/943/Online-Payment-Instructions-PDF>- A project number must be assigned by Inspection office staff before making a payment online. A service fee will be charged for online payment.

4. Apply for the Permit:

- Please plan ahead and pick one of the following methods to apply for your permit. Make sure all of the required information listed above is included and submit it to the Department of Community and Economic Development using one of the methods listed below:
 - ***In Person with an Inspector at City Hall:***
 - This is the best method to discuss the specifics of your project with an inspector. Typically if all the required information is submitted and found acceptable, the permit can be issued at that time.
 - Inspectors are available for consultation and permit issuance 8:00 a.m. - 4:00 p.m., Monday through Friday.
 - ***By Email:***
 - Email all the required information (Site Plan and Permit Application) to SitePlanGB@greenbaywi.gov.
 - ***By Mail:***
 - City of Green Bay
Department of Community and Economic Development
100 N Jefferson Street, Room 608
Green Bay, WI 54301

Submittal Checklist:

- ✓ Building Plans/Layout of basement AND
 - a. Fill out Basement Finish Sheet
- ✓ Building Permit Application
 - a. Electrical Permit (if applicable = Homeowners vs Contractors)
 - b. HVAC Permit (if applicable = Homeowners vs Contractors)
 - c. Plumbing Permit (if applicable = Homeowners vs Contractors)

BASEMENT FINISH LAYOUT SHEET

Basement finish

- Total square footage of project _____
- Ceiling height _____
 - **MUST BE 7 FEET (84 INCHES)**
- Ceiling finishing (sheet rock info/ceiling tiles) _____
- Stud type info/on center spacing _____
- Bottom plate (treated/size) _____
- Insulation in wall _____
- Sheet rock on wall _____
- Door and header sizes _____
- Carbon monoxide and smoke detector information _____
- Any bedrooms? If so, egress information _____
 - Every bedroom shall be wired to meet the requirements of the National Electric Code and is required to have a heat source.
- Any Plumbing/Electrical/HVAC? _____
 - If answered yes, please have trade permits filled out for submittal.

- ***Basements must have a hard wired CO/SD**
 - **Within 21 feet of bedroom**
- ***Basement bedrooms must have hard wired SD**
- ***Bathroom must be vented**
- ***Provide Building Plans/layout of basement**

*Helpful information can be found on the DSPS website, Chapter 321 (SPS 321.03 Exits; SPS 321.035 Interior circulations; SPS 321.04 Stairway and Elevated areas; SPS 321.05 Natural Light and Ventilation; SPS 321.06 Ceiling Height; SPS 321.09 and 321.095 Smoke and CO protection.

BASEMENT BUILDING CODE REQUIREMENTS

- **CEILING HEIGHT**
 - **MUST BE 7 FEET FOR HABITABLE ROOMS** (Bathrooms, bedrooms, living room, kitchen, hallways, etc.) SPS 321.06
- Bedroom in basement:
 - Shall be provided with two forms of egress. SPS 321.03 (5)(b).
 - Shall have hard wired smoke detector inside bedroom.
- Shall have hard wired smoke detector within 21' of bedroom. SPS 321.09
 - Shall have 8% natural light in bedroom. SPS 321.05
- Smoke Detector / Carbon Monoxide Detector in common area – Must be hard wired and within 21 feet of bedroom. SPS 321.09
- Basement must comply with current National Electrical Code.
- Basement bathrooms must be vented to exterior of house.
- Helpful information can be found on the DSPS website Chapter 321 (SPS 321.03 Exits; SPS 321.035 Interior circulations; SPS 321.04 Stairway and Elevated areas; SPS 321.05 Natural Light and Ventilation; SPS 321.06 Ceiling Height; SPS 321.09 and 321.095 Smoke and CO protection.

SPS 321.05 Natural light and natural ventilation.

1. Natural light. All habitable rooms shall be provided with natural light by means of glazed openings. The area of the glazed openings shall be at least 8% of the net floor area, except under the following circumstances.
 - (a) Exception. Habitable rooms, other than bedrooms, located in basements or ground floors do not require natural light.
 - (b) Exception. Natural light may be obtained from adjoining areas through glazed openings, louvers or other approved methods. Door openings into adjoining areas may not be used to satisfy this requirement.
2. Ventilation.
 - (a) Natural ventilation. Natural ventilation shall be provided to all habitable rooms by means of openable doors, skylights or windows. The net area of the openable doors, skylights or windows shall be at least 3.5% of the net floor area of the room. Balanced mechanical ventilation may be provided in lieu of openable exterior doors, skylights or windows provided the system is capable of providing at least one air change per hour of fresh outside air while the room is occupied. Infiltration may not be considered as make-up air for balancing purposes.

BEDROOM BASEMENT WINDOW REQUIREMENTS FOR AN EGRESS WINDOW

1. The window must be within the basement bedroom.
2. Not required in most cases if 2 basement stairways are present.
3. A 20 inch by 24 inch or 24 inch by 20 inch box must fit through the window opening without using tools.
4. Minimal natural light and natural ventilation is always required in a basement bedroom.

SPS 321.03 (6) Windows used for exiting.

1. Windows which are installed for exit purposes shall comply with the requirements of this subsection.
 - (a) The window shall be openable from the inside without the use of tools or the removal of a sash. If equipped with a storm or screen, it shall be openable from the inside.
 - (b)
 1. The nominal size of the net clear window opening shall be at least 20 inches by 24 inches irrespective of height or width. Nominal dimensions shall be determined by rounding up fractions of inches if they are 1/2 inch or greater or rounding down fractions of inches if they are less than 1/2 inch.
 2. No portion of the window, including stops, stools, meeting rails and operator arms, shall infringe on the required opening.
 - (c) The area and dimension requirements of par. (b) may be infringed on by a storm window.
 - (d)
 1. For any window used for exiting, the lowest point of clear opening shall be no more than 60 inches above the floor.
 2. If the lowest point of clear opening is more than 46 inches above the floor, a permanent platform or fixture shall be installed such that a flat surface at least 20 inches wide and 9 inches deep is located no more than 46 inches directly below the clear opening.
 3. The topmost surface of the platform or fixture shall be no more than 24 inches above the floor.
 4. The topmost surface of the platform or fixture shall support a live load of at last 200 pounds.
 5. A stair used for the sole purpose of reaching the top of the platform or fixture is exempt from the requirements of s. SPS321.04.
 - (e)
 1. An egress window with any point of clear opening below adjacent grade shall be provided with an areaway in accordance with this section.
 2. The width of the areaway shall be at least equal to the width of the window.
 3. The areaway shall be a minimum of 36 inches measured perpendicular from the outer surface of the below-grade wall.
 4. If the bottom of the areaway is more than 46 inches below adjacent grade or the top of the areaway enclosure, the areaway shall be provided with a ladder or at least one additional step to aid egress. Steps used to comply with this section are exempt from the requirements of s. SPS321.04.

BASICS FOR REMODEL WIRING

Lighting:

At least 1 wall-switch controlled lighting outlet is required in the following locations:

- Every habitable room, bathroom, kitchen, etc.
- Hallways and stairways (interior stairways require a switch at each floor level where the difference between floor levels is 6 steps or more).
- Attached garages and detached garages with electric power.
- Attic, under floor spaces, utility rooms, and basements shall have a least 1 lighting outlet containing a switch or controlled by a wall switch at the usual point of entry, if these spaces are used for storage or contain equipment requiring servicing.
- On the exterior side of exterior entrances and exits with grade access.

Receptacles:

- Receptacles in habitable rooms to be located within 6 feet of a door and every 12 feet thereafter (there shall be no point along a wall more than 6 feet from a receptacle) and any wall greater than 2 feet in width.
- All receptacles lower than 5 1/2 feet from the floor must be tamper resistant type (TR).
- A minimum of 1 receptacle for hallways longer than 10 feet.
- A receptacle is required on any wall space greater than 2 feet.
- At least 1 receptacle outlet shall serve an island or peninsula.
- Bathroom receptacles are required to be on a 20-amp branch circuit and GFCI protected with no other outlets.
- At least 1 bathroom receptacle is to be located within 36 inches of the outside edge of each basin.
- Laundry areas shall have a least 1 120-volt receptacle outlet supplied by a 20-amp branch circuit.
- Kitchen countertop receptacles shall be placed so that at no point along the wall space there is no longer than 2 feet measured horizontally from an outlet (typical 4 feet spacing) and any counter space greater than 12 inches. These receptacles shall be on at least two 20-amp branch circuits and be GFCI protected.
- Outdoor receptacle outlets shall be installed at the front and back of the dwelling and not more than 6 1/2 feet above grade (GFCI protection required).
- GFCI protection is required in bathrooms, kitchens, basements, outside and within 6 feet of any sink. At least 1 GFCI protected receptacle is required in all unfinished portions of a basement.

General Installation Requirements:

- Romex (type NM cable) shall be supported within 8 inches of a plastic box and 12 inches of a metal box and every 4 1/2 feet thereafter (holes in studs are considered support).
- All new lighting outlet and receptacle circuits must be arc fault (AFCI) protected in finished areas.
- Metallic boxes are to be grounded.
- A rough-in inspection must be scheduled before insulation or drywall is installed.

(REQUIRED)

NOTE: Duplexes, condos, and other similar dwelling units, which are physically attached to other dwelling units, are not single-family dwellings. The City electrical code allows homeowners to do wiring in existing single-family dwellings only.

Before insulating or covering any walls containing any wiring, call the Community and Economic Development Department for a rough-in inspection. At that time, all grounding splices should be made up permanently. When the job is completed, call for a final inspection prior to occupancy.

To schedule an inspection, call (920) 448-3300 between 8:00 a.m. and 4:00 p.m. at least one business day prior to inspection date needed. Final inspections are required for all projects.

Excerpt from City of Green Bay Plumbing Code:

Section 16.06 Permit must be procured before starting work: If any work regulated by the Plumbing Ordinance for which a permit is required is commenced without a permit first having been obtained thereof, double the permit fee herein prescribed shall be paid when a permit finally is obtained. Payment of any fee mentioned in this Section, however, shall in no way relieve any person of the penalties that may be imposed for violation of the Plumbing Ordinance.
